We appreciate your interest in our Precast Concrete Partially Buried Below Ground (BG) Storm Shelters. We offer two styles of Below Ground Storm Shelters available in various sizes. The first thing to consider is which style is best suited for your site conditions and needs. Below is a description of each style and we have also attached drawings for your reference.

Partially Buried Below Ground (BG) Storm Shelters Manufactured Per NSSA Standard

- More sizing options available than the Above Ground (AG) shelters
- Only the top 18" of these Shelters stick out of the ground
- Below Ground Shelters tend to be cooler than the above ground temperature in the Summer and warmer than the above ground temperature in the Winter
 - **Below Ground With Roof-Mounted Hatch (BGH)**
 - Advantages
 - Less below ground components required than the Walk-In Door Shelters
 - Smaller excavation required than the Walk-In Door Shelters
 - **Below Ground With Walk-In Door (BGD)**
 - Advantages
 - Stairway entry vs. the ladder entry that comes with the Roof-Mounted Hatch Shelters
 - Some say this shelter is less likely to become obstructed by storm debris
 - **Quick Facts For Both Styles**
 - Excavation and dirt removal are not included in our standard pricing
 - Both are available at additional cost
 - We can set up to a 6'W x 12'L or 8'W x 10'L Shelter with our boom truck/crane
 - Location must be accessible for our boom truck/crane to set it in place
 - We must be able to back our boom truck up to within 14 ft. of the shelter's location
 - Site must be clear of overhead power lines, trees or any other obstructions
 - Any Shelter larger than this will require a third party crane service to set the Shelter
 - Third party crane service is not included in our standard pricing and would be additional cost
 - It is the Purchaser's responsibility to coordinate the third party crane service
 - Possible crane services in the Amarillo area are:
 - Barnhardt @ 806-789-7525
 - Panhandle @ 806-335-9010

We highly recommend that you come by and see the storm shelters that we have on display at our plant. The display is located at our entrance and can be looked at anytime. Our plant is located at 10021 Amarillo Blvd East in Amarillo, TX (map attached). This will give you an opportunity to see the shelters up close and visit with our staff in person between the hours of 7:30AM-5:30PM M-F or Saturday by appointment only.

We look forward to helping you with all of your storm shelter needs and hope to hear from you soon!

Thank You!

Vaughn Concrete Products, Inc.
